

Live Digital Streaming Service

This service includes broadcast network quality high definition digital video streamed live to one or more platforms including Facebook Live™, Youtube Live™, etc. Our Basic Service includes the following:

- ◆ One professional tripod mounted camera with lights,
- ◆ One computer switcher and media source for Power Point, etc.,
- ◆ One wireless microphone⁽⁴⁾, and
- ◆ Optional amplified speaker system⁽⁵⁾ for local sound for live audiences.

Basic Service Cost: **\$295.00**^(1,2)

The live stream will be captured with professional video cameras and broadcast in HD over the internet to the standard of the broadcast platform(s).

Notes:

- (1) Basic Service includes professional lower third graphics and text.
- (2) Basic Service includes Live Streaming up to two (2) hours duration. The rate for additional time is **\$75/hr.**
- (3) Additional equipment is available including unmanned fixed wide angle cameras for **\$25 each.** Additional manned cameras are **\$125/hr** with a 2-hour minimum.
- (4) The Basic Service microphone included is a body pack wireless transmitter configured for lavalier or head-worn use. We can provide an analog to digital mixing console (**\$50**) with additional mics including wireless (**\$50 each**) and/or wired (**\$25 each**) types.
- (5) We can provide a sound system suitable for small venues (up to 100 people) for an additional **\$75** charge. We can also accommodate medium to large size venues. The cost will be dependent on a site survey.
- (6) To insure a stable high quality stream, we prefer using a hard-wired Ethernet connection to a local router or switch with 5-10 Mbps upload speed. Under certain circumstances this can be accomplished utilizing local Wifi. We will conduct an on site survey to determine whether or not the existing internet service is adequate for HD live streaming. If not, we will need to contact and resolve this issue with your internet service provider (ISP). Often times this is just a matter of a phone call. A small one time added charge by your ISP may occur.
